XNET Main Feature

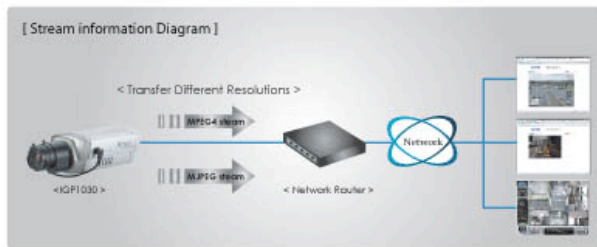

Hybrid IP Technology

XNET can support Hybrid technology. At a standard analog CCTV BNC composite connection for CCTV system. At the same time, monitoring image over IP.

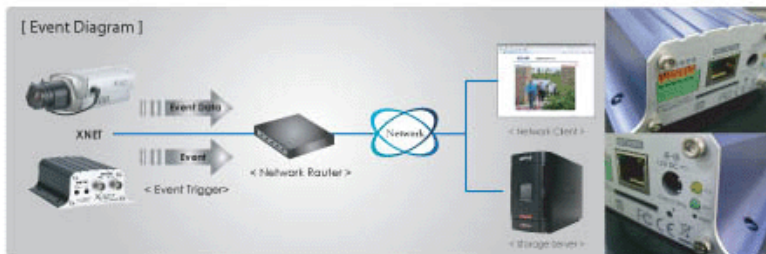

Dynamic Dual Stream

XNET can support dual streaming for multi-client. H.264(or MPEG4) and MJPEG images can be output at the same time. User can see live monitoring with H.264(or MPEG4) and MJPEG based high quality stream image saving to storage.

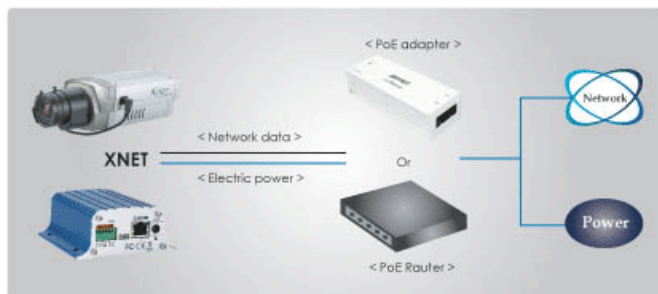

Multiple Event Trigger

XNET also includes activity motion / sensor detection. Easily defined event setting and on-screen display. Activity detection events, XNET supports trigger event output over IP and can save the event image.

Built-in PoE(Power over Ethernet)

Saving the installation cost, just do connect the cable to a PoE network hub or PoE network adaptor for easy installation with XNET IP product. CNB all IP products are standard IEEE 802.3af supported. (Optional)
